

Steinfinisher G2

Compact stone finisher with controlled coolant supply for mounting or installation in eco-line machines, for single part processing up to mass production.

The G2 stone finisher is controlled and monitored via a Siemens control system (bus-capable). The new integrated coolant supply increases process reliability and reduces the finishing time.

All parameters are entered and monitored via the screen. All error messages are displayed on the Siemens Touch as plain text messages.

Thanks to the bus system, the devices are also particularly suitable for installation in CNC machines and large systems.

Technical Data

Oscillation Frequency	0 – 70 Hz
Oscillation Stroke	+/-0.25 – +/-2.5 mm
Compressed Air	Max: 0.8 MPa
Weight	12 kg
Contact Stroke	25 mm
Contact Roll Widths	5 mm to 80 mm
Contact Pressure Max	270 Notches
Operating Voltage	1 x 230 V / 50 Hz
Control Cabinet	Siemens Touch-Panel

All parameters are digitally entered and monitored
